SDG Goal 16	**Peace, justice and strong institutions**
SDG Target 16.b	**Promote and enforce non-discriminatory laws and policies for sustainable development**
SDG Indicator 16.b.1	**Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law**
Time series	**Population who felt discriminated in their contacts with public services in the last two years**

1. General information on the time series

- Date of national metadata: 27 January 2022
- National data: http://sdg-indicators.de/16-b-1/
- Definition: The time series measures the share of population who felt discriminated in their contacts with public services in the last two years. It provides information about the relative share of the population, which reported having personally felt discriminated against or harassed, as compared to the share of the total population interviewed.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: December 2018
- UN metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-0b-01.pdf
- The time series is not compliant with the UN metadata, but provides additional information.

3. Data description

- The data is based on a special evaluation from the Life Situation Survey, which is commissioned by the Federal Government and carried out by the Federal Statistical Office. In 2021 around 6,000 citizens and more than 2,700 business were interviewed.
  Data is only available from 2015 onwards.

4. Access to data source

- Not available.

5. Metadata on source data

- General information on the Life Situation Survey (only available in German):
  https://www.amtlich-einfach.de/DE/Hintergrund/Zufriedenheitsbefragung/Zufriedenheitsbefragung_node.html

6. Timeliness and frequency

- Timeliness: Not available.
- Frequency: Every 2 years

7. Calculation method

- Unit of measurement: Percentage
- Calculation:

$$\text{Proportion of population, which felt discriminated} = \frac{\text{Persons reporting having personally felt discriminated against or harassed [number]}}{\text{Total population interviewed [number]}} \cdot 100 \, [\%]$$
